

# Pipe-Couplings

RO-FI Precision in Stainless Steel

## The pipe coupling is an authentic connecting member for metal- and plastic pipes

### Vantages

- planning reliability by ready-for-assembly delivery
- calculable assembly time
- light heaviness and lower required space
- airtight and long-lasting
- protection of the pipeline and respectively valves by absorb-ability
- cost savings by re-usability
- short interruption time at repairs
- compensation properties

This are just a few vantages which gives you the application of tube couplings.

The tube coupling is in wide explanations and for many different applications available.

Successive we give you a an overview.

### Explanations

- gasket sleeve in EPDM/NBR
- not force-fit (flexible) respectively force-fit (tensile strength)
- casing and coupling in different qualities of stainless steel and zinc coated
- for the most of commercial tube dimensions

Give us your requirement, we like to consult you!!!
